# Power Platform licensing model concepts\*

## Licenses in a typical “Software as a Service model”

Easy to anticipate solution costs with per user licenses.

Extend Office 365 with seeded Power Platform features

- Power Apps for O365 or D365
- Power Automate for O365
- Power Automate for D365
- PowerBI Pro in Office 365 E5
- Microsoft Dataverse for Teams
- Power Virtual Agents for Teams

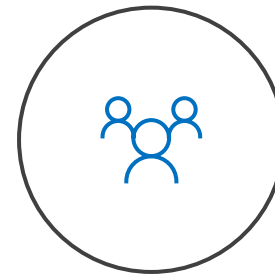

Use full product features with standalone premium user licenses

- Power Apps per App
- Power Apps per User
- Power Automate per User
- Attended RPA per user
- Power BI Pro

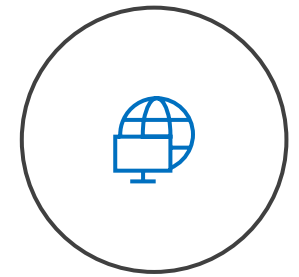

## Add-ons and licenses in a “Capacity Based model”

Allow your solution to evolve with your business needs.

Share features across the organization without paid individual user licenses

- Power Automate per flow
- PowerBI Premium
- AI Builder
- Power Virtual Agents
- Unattended RPA add-on

Share access to some features with external audience without individual user licenses

- Power Portals
- AI Builder
- PowerBI Premium
- Power Virtual Agents
